Sedgefield Middle School Transition Update

May 14, 2018

Education Value-Added Assessment System (EVAAS) Data

QUESTION:

Are teachers at Sedgefield Middle School growing all levels of students?

ANSWER:

YES!

EVAAS Data

How do we know?

Methodology

- Data source = EVAAS Teacher Diagnostic Summary Report
- For this report, students are placed in three groups, based on a state-wide distribution of student scores for EOG/EOC/NCFE - Lowest, Middle, and Highest
- We looked at the percentage of TEACHERS that grew their students in each group, as well as overall
- Data only includes staff that were at SMS in 2016-2017 **AND** are currently teaching at SMS in 2017-2018

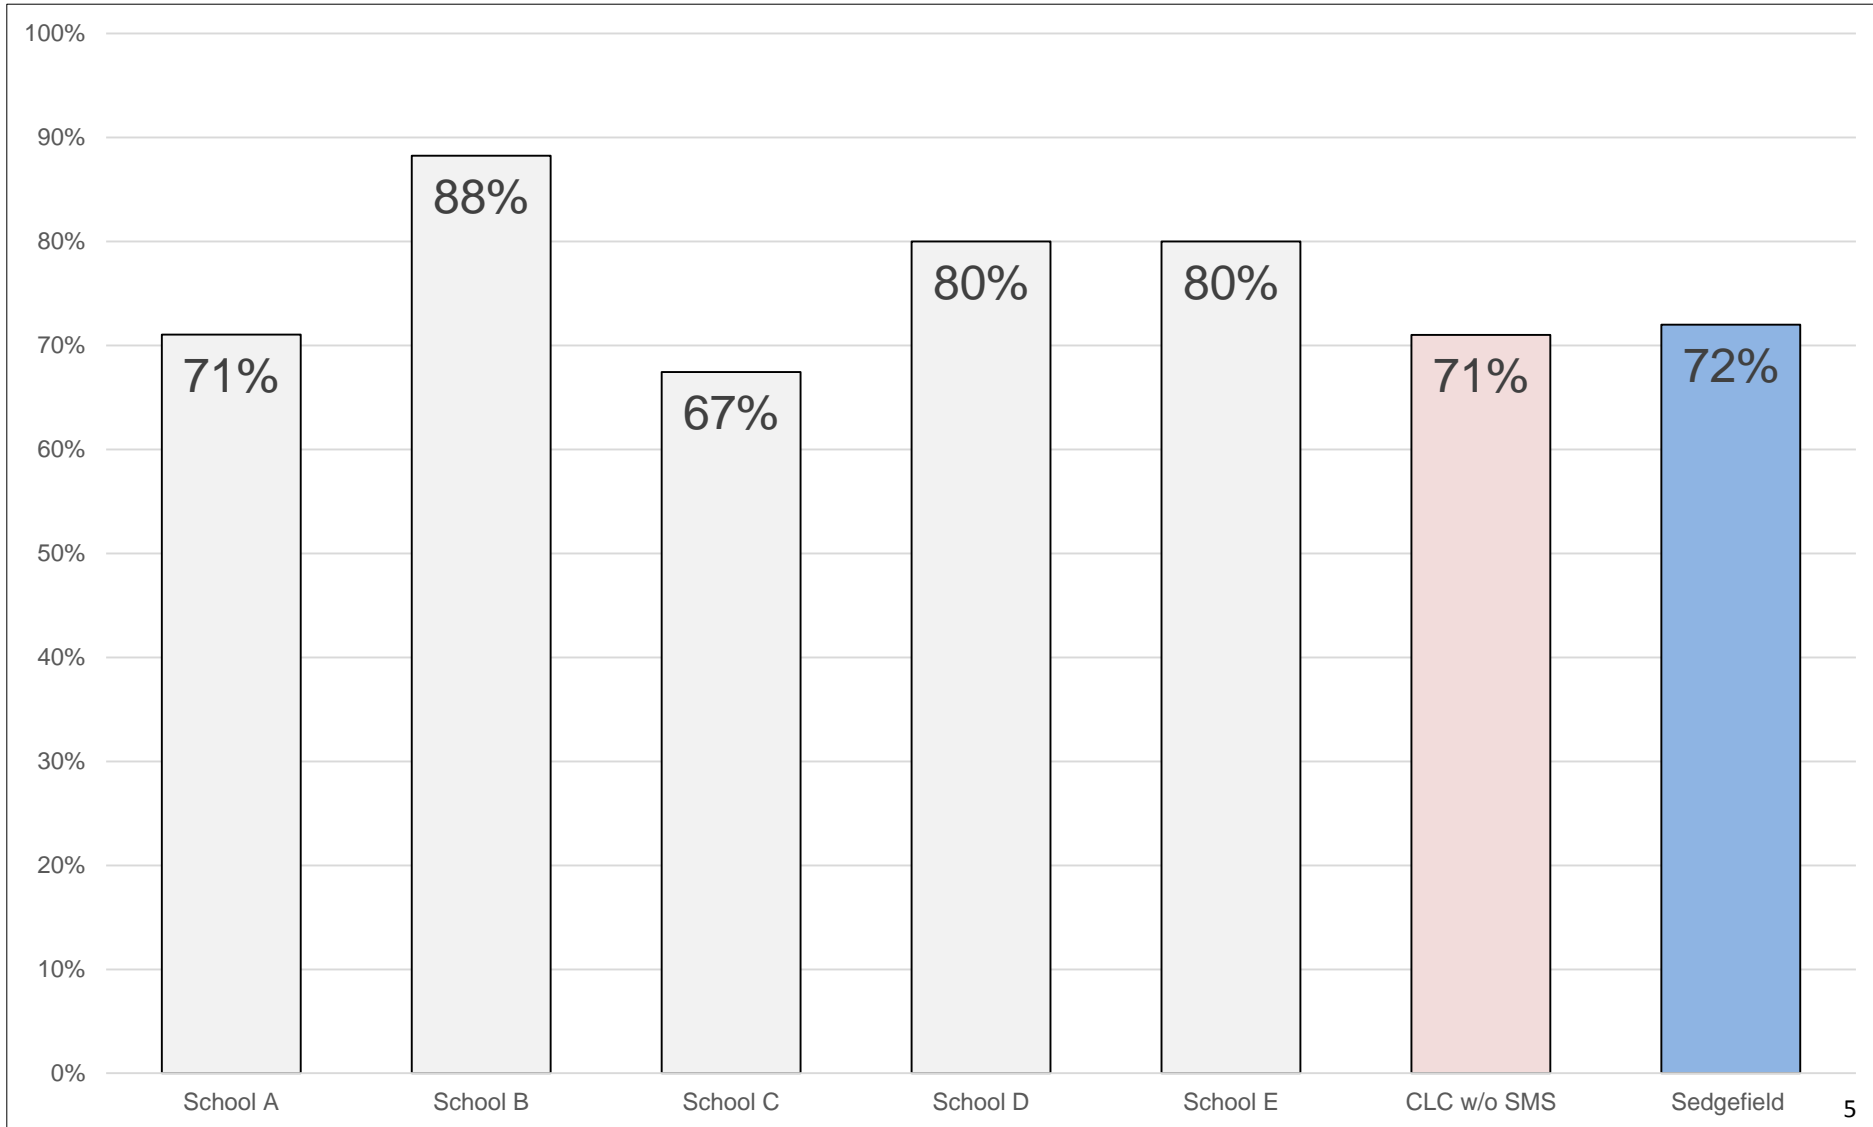

EVAAS Data

Is this growth comparable?

- We used the same data sets and rules for middle schools in the Central Learning Community during the 2015-2016 SY
 - Alexander Graham
 - Carmel
 - McClintock
 - Piedmont
 - Randolph
- On the graphs, schools are coded A – E and do NOT correlate to the list above.

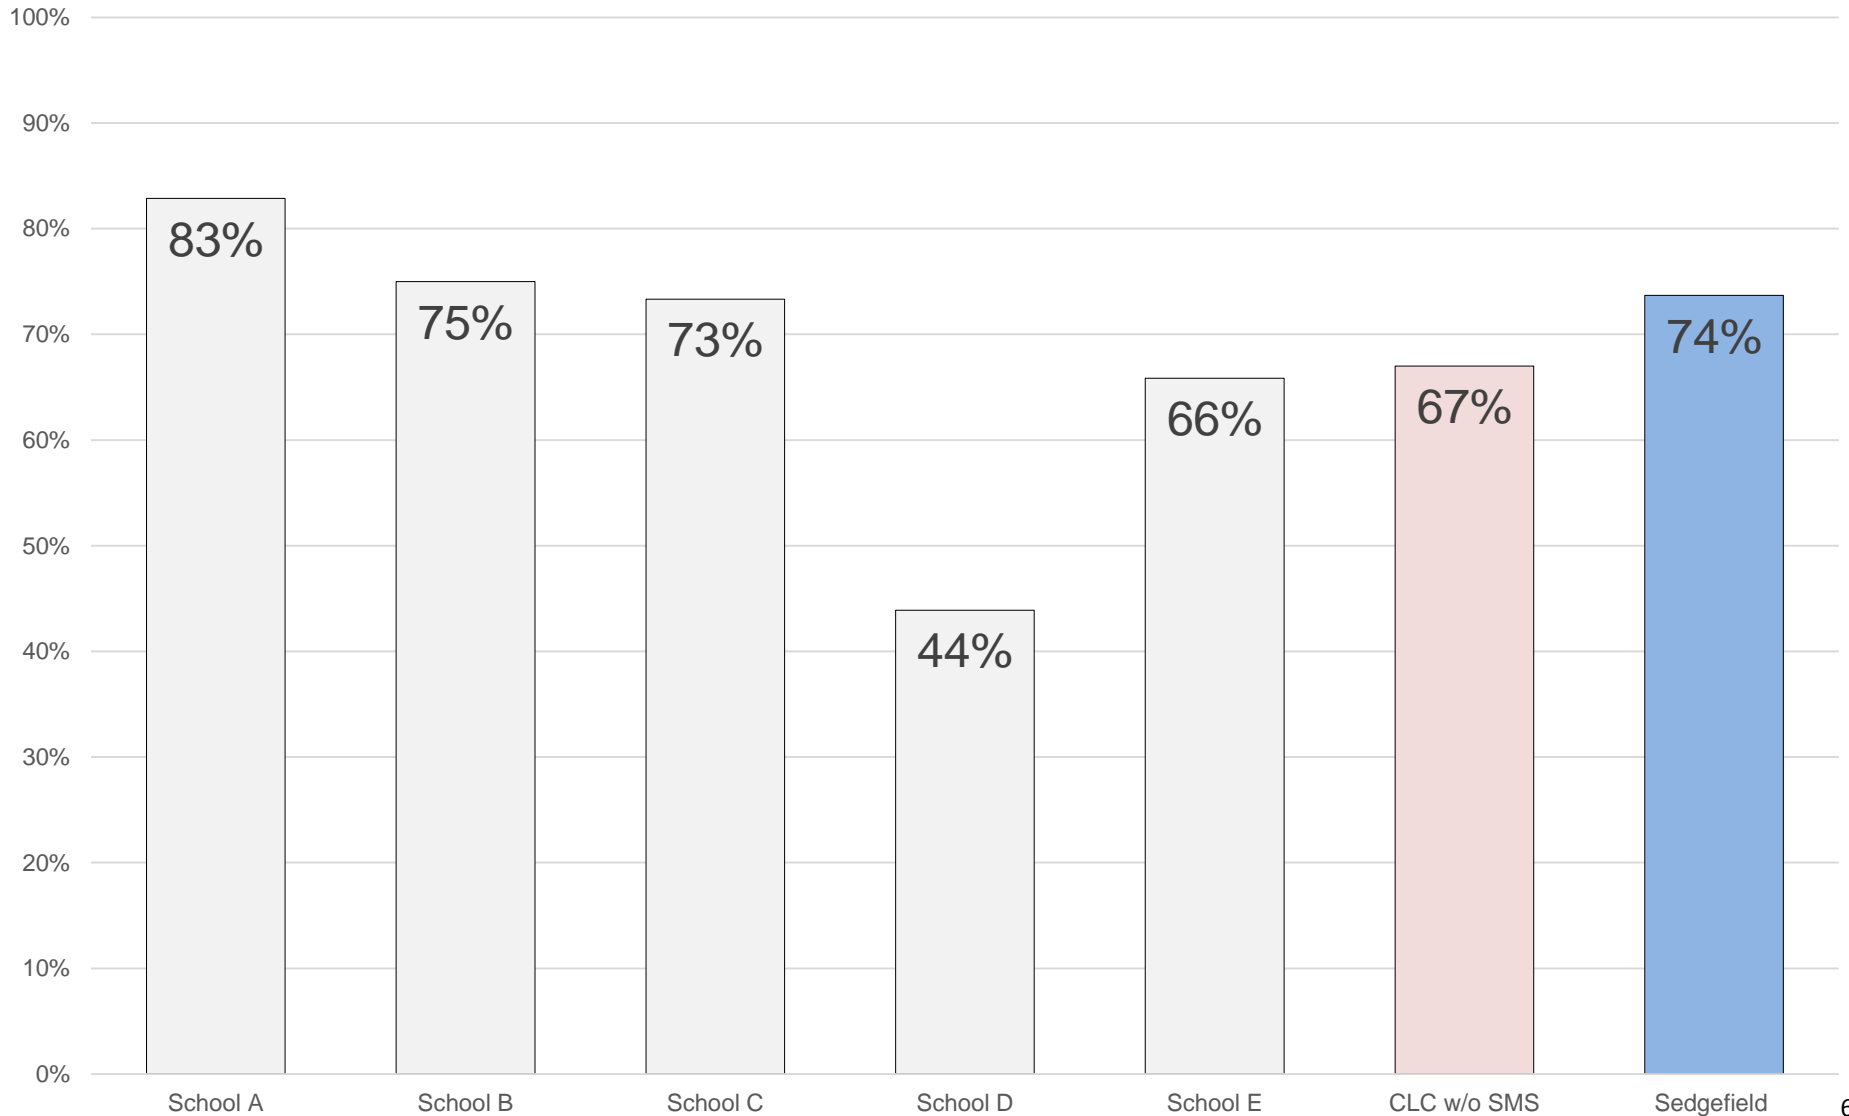

LOWEST GROUP

Percentage of teachers growing students in this group.

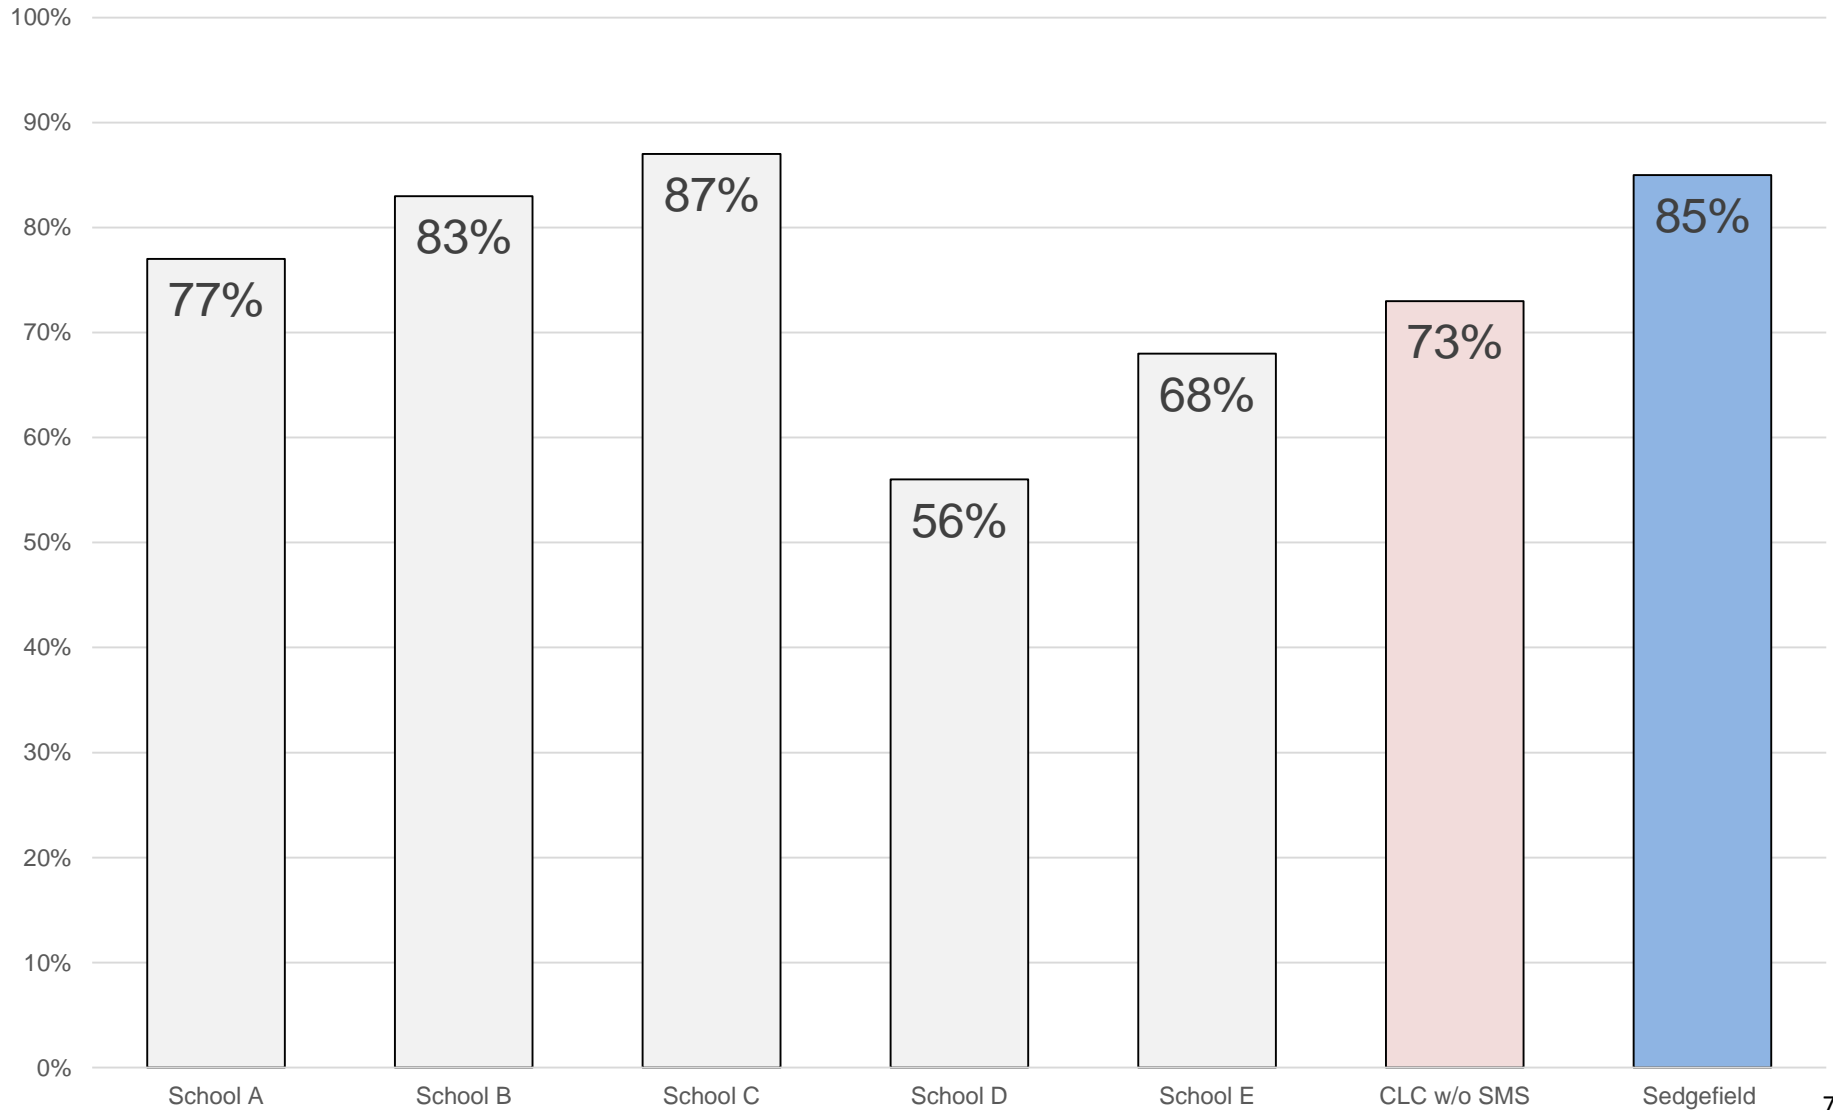

MIDDLE GROUP

Percentage of teachers growing students in this group.

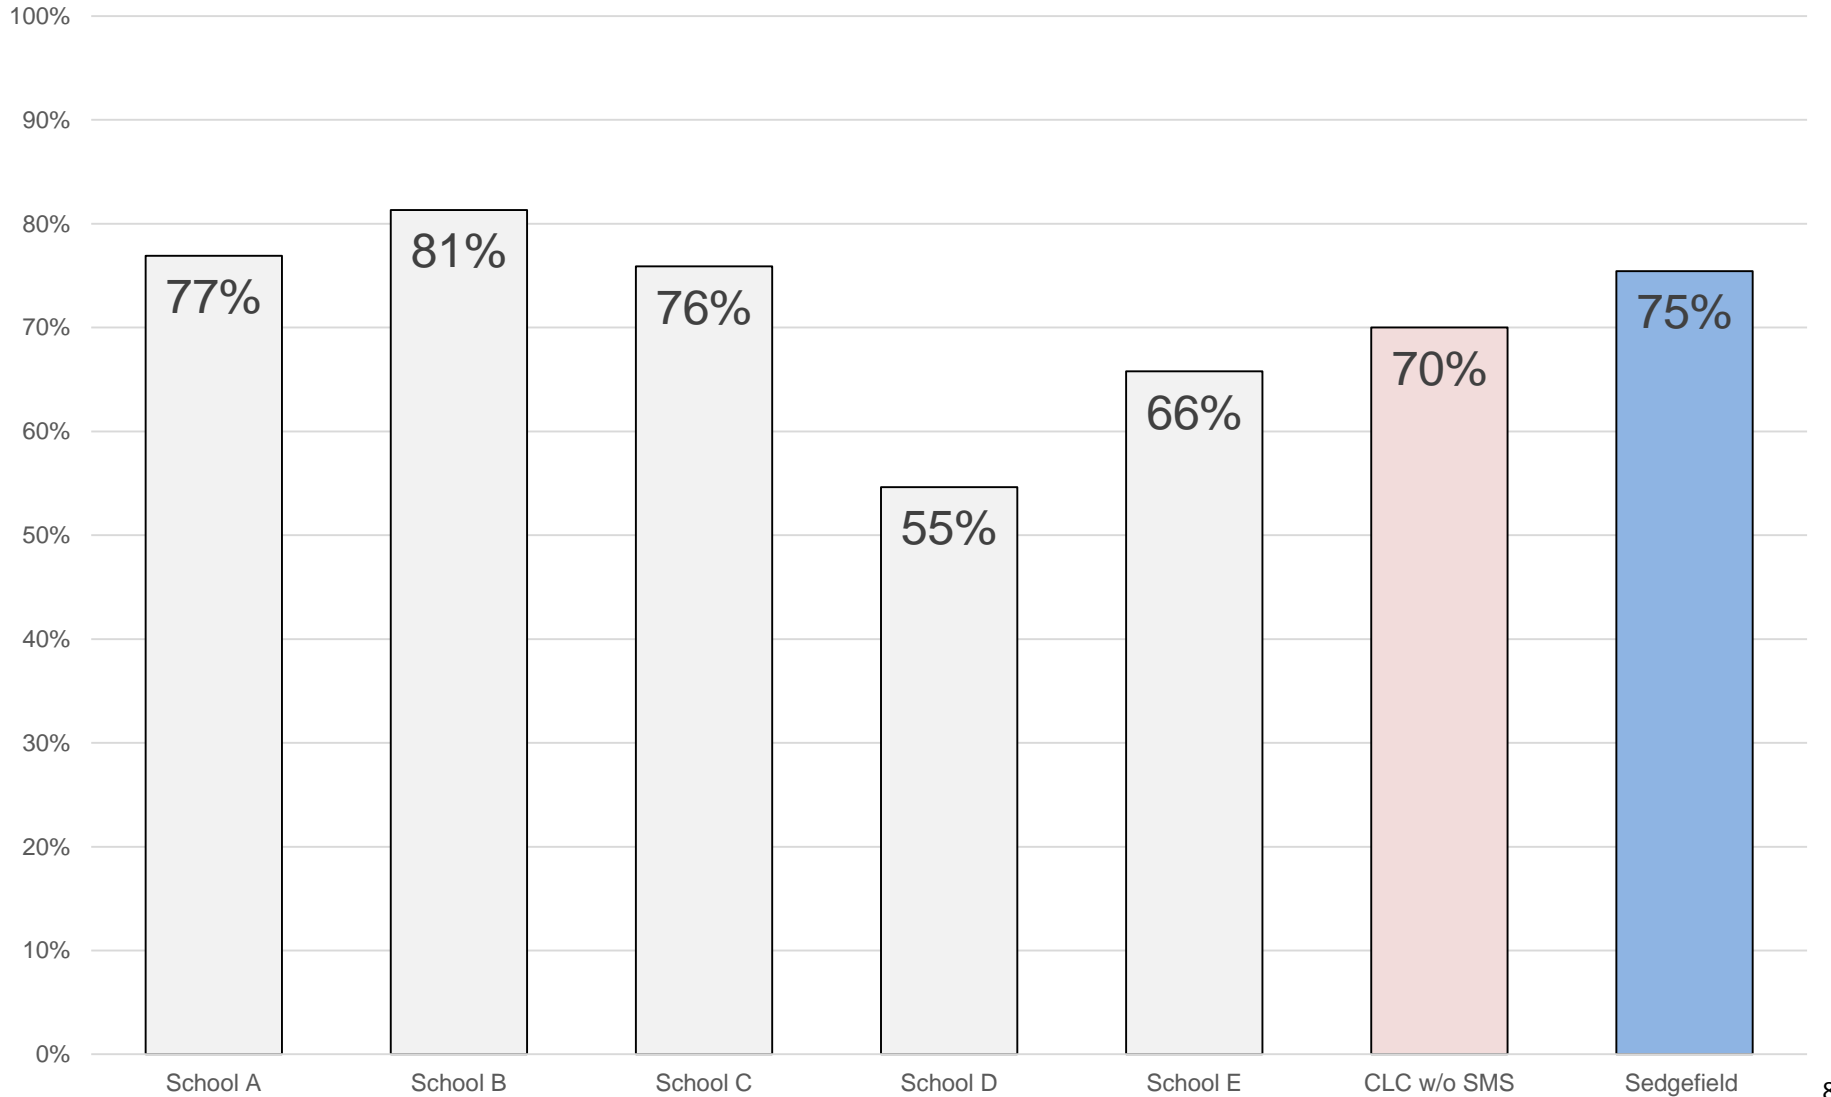

HIGHEST GROUP

Percentage of teachers growing students in this group.

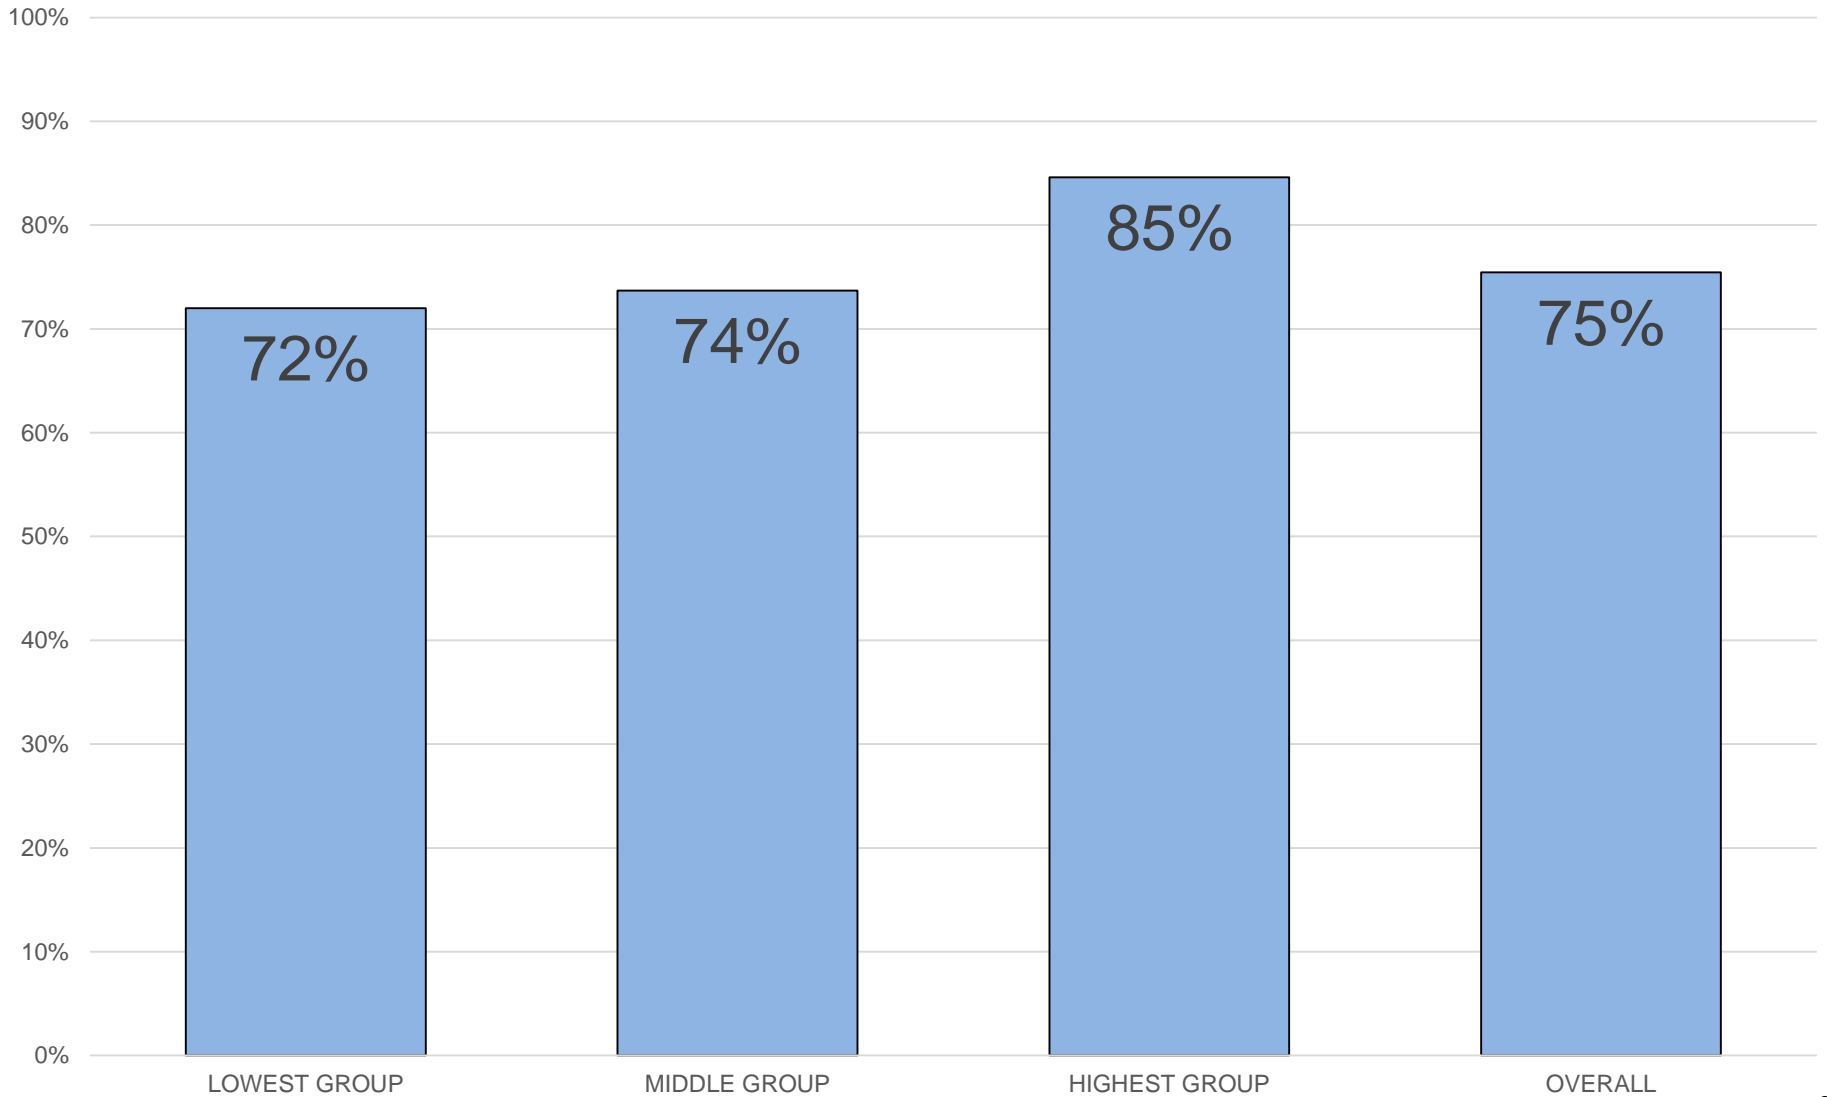

OVERALL

Percentage of teachers growing students in all groups.

SEDGEFIELD MIDDLE

Percentage of teachers growing students in each group.

EVAAS Data

Remember...

- We are looking at the percentage of **TEACHERS** that grew students.
- This data is a component of the NC School Performance Grades for schools.
